

we took the salt out of soft

When it comes to hard water, there is no need to look any further.

The Aquios full house water softener and filtration system is salt-free, reduces the damage caused by hard water while filtering out chlorine odor, taste and other harmful impurities such as chloroforms and other organic chemicals.

You'll see a reduction in water spotting, existing scale along with the need for less soap and other cleaning products. Your water won't have a "slippery" feel and your hair and skin will feel softer and clean.

The result is clean, pure, conditioned water that is safe for you and your entire family as well as the environment.

All of this in a sleek, compact unit that doesn't require any maintenance, uses no electricity and is eco-friendly. Now that's simple.

Aquios, brilliantly simple.
