

# **Features**

- · 304 Stainless Steel 2 Stage System
- · 1" NPT inlet & outlet
- 300 PSI Maximum pressure
- Spring load Knife-edge seal for a positive seal eliminating by-pass
- 5 micron carbon impregnated filter reduces odor, taste and sediment
- 5 micron radial flow catalytic carbon filter that reduces chloramines, VOCs, chlorine, hydrogen sulfide (H2S)
- Scale prevention media that prevents and removes harmful scale
- Effective in water hardness up to 30 GPG

# **Specifications**

Dimensions: 17"x 27"
Operating Temp: 40°F-180°F
Max Pressure: 300 PSI
Max Hardness: 30 GPG
Flow Rate: 18 GPM

Filter Rating: Stage 1: 5 micron CP

Stage 2: 5 micron CC

· Filter Life: 6 months

# Product Overview

# AQFS234S Jumbo Scale Prevention & Filtration System

Designed for homes over 2500 square feet

The Aquios® AQFS234S is our premium, stainless steel full house system specifically designed for the reduction of chlorine, chloramines, trihalomethanes (THMs), tetrachloroethylene, rust, sediment and lime scale accumulation on pipes, fixtures and appliances. Our systems do not demineralize or introduce salt or potasium chloride into your water. Instead, we utilize a food grade, scale prevention media that prevents hard water minerals from creating scale, removes existing buildup and also provides an anticorrosive layer to protect pipes and appliances.

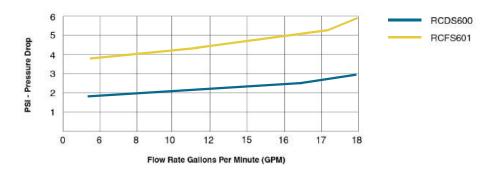

Our high pressure stainless steel housing utilizes our 5 micron, radial flow catalytic carbon cartridge with our proprietary scale prevention media designed to prevent and remove harmful scale build up. The catalyic carbon will remove chlorine, chloramines, hydrongen sulfide gas, rust particles, dirt sand, volatile organics compounds (VOCs), THMs and other impurities from your water.

This wall mounted unit is designed to be installed at the water main entry point and will provide a flow rate of up to 18 gallons per minute (GPM). The standard inlet and outlet connections are 1" NPT and has a design pressure of 300 PSI (20.6 bar) with a maximum operating temperature of 180°F (82°C).

# **Product Specifications**

Model No	Description	Dimensions	Fitting B	ox Size	Weight	
AQFS234S	Jumbo Scale Prevention System	25.72" x 5.95"	1" NPT 26	S" x 10" x 6"	17.5lb	
Replacement Filter	Description	Dimensions	Type	Max Flow Rate		
RCFS236	Replacement Cartridge	4.50" x 20"	Carbon Block	18 GPM		
RCDS601	Replacement Cartridge,	4.50" x 20"	Catalytic Carbo	18 GPM	18 GPM
